Summary

Frontend-focused Full Stack Developer skilled in building scalable web applications and AI-powered systems using LLM integration, REST APIs, and modern frameworks. Experienced in developing production-ready solutions using prompt engineering, RAG pipelines, and data-driven workflows for intelligent user-centric applications.

Education

B.Tech – Artificial Intelligence & Machine Learning

2023–2027

Charotar University of Science & Technology (CHARUSAT)

CGPA: 7.73

Relevant Coursework: Data Structures, Database Management Systems, Machine Learning, Operating Systems

Technical Skills

Languages: Python, JavaScript, SQL, C/C++, Java

Frontend: React.js, HTML, CSS, Redux

Backend: Node.js, Express, FastAPI, Flask, PHP (Working Knowledge), REST APIs

AI/ML: Machine Learning, Regression, Classification, Feature Engineering, RAG, Prompt Engineering, Embeddings, LLMs Integration (OpenAI, Hugging Face)

Databases: MongoDB, MySQL, PostgreSQL, Firebase, Supabase

Tools & Concepts: Git, API Integration, Data Pipelines, Distributed Systems, Linux (Basic), Deployment

Projects

Multi-Agent AIOps Platform

GitHub

- Engineered real-time AIOps platform leveraging ML-based data pipelines for anomaly detection and automated incident management.
- Architected distributed backend with REST APIs, enabling predictive analytics, system monitoring, and dashboard visualization.

Chronos – AI Planning Assistant

GitHub

- Created LLM-powered assistant utilizing prompt engineering and context-aware reasoning for intelligent planning workflows.
- Integrated real-time weather APIs with caching, structured data handling, and optimized response generation.

TrendMart – MERN E-Commerce

GitHub • Live

- Implemented full-stack MERN application with React.js, Node.js, MongoDB, JWT authentication, and role-based access control.
- Developed RESTful APIs, enhanced database performance, and deployed scalable production-ready infrastructure.

Achievements

Winner – WiBD GenAI Hackathon 2026 (Team HackIconics)

Developed Chronos, an AI-driven weather-adaptive planning assistant utilizing LLM reasoning and structured validation.

Experience

Frontend Developer Intern – Antim Technology LLP

May 2025 – June 2025

Developed reusable React.js components and integrated REST APIs, improving modularity, maintainability, and frontend performance.

Collaborated on feature development, debugging, and optimization, enhancing application responsiveness and development workflow efficiency.

Certifications

AWS Cloud Practitioner Essentials (AWS)

Gen AI: Advancing Systems Analysis & Architecture (IBM)

Backend Development and API Creation (Packt)

Fundamentals of Azure Databricks (Packt)

Machine Learning with Python (freeCodeCamp)

Frontend Development with React (Packt)
